

A reception dinner will be held at 7:00pm, Monday, 4 Nov, at the Hotel Matyšák

5.11. Tuesday		
<b>Hotel Departure (9:30)</b>		
<b>Airport pickup (10:00)</b>		
<b>Arrival and check-in (11:00-12:00)</b>		
<b>Lunch (12:00-13:30)</b>	+ coffee / tea	
<b>Conference opens (13:30-14:00)</b>	Welcome	
<b>Castle tour (14:00-15:00)</b>	√	
<b>Session 1 (15:00-15:30)</b>	H. Horvath	Past aerosol campaigns and what we must improve
<b>Coffee break (15:30-16:00)</b>	√	
<b>Session 1 (16:00-17:00)</b>	M. Kocifaj	Modelling the night sky radiances under broken cloud arrays
<b>Session 2 (17:00-18:00)</b>	I. Ahmad, M. Komppula, H. Portin, S. Romakkaniemi	Aerosol cloud interaction measured with MODIS and in situ data
	M. M. Cazacu, A. Timofte, F. Unga, S. O. Gurliu	lasi aerosol mixtures, one year time-scale overview: AERONET data
<b>Conference Dinner (18:30-?)</b>	-	

6.11. Wednesday		
<b>Breakfast (8:00-9:30)</b>	buffet	
<b>Session 3 (9:30-11:00)</b>	S. O. Gurliu, A. Timofte, F. Unga, M. M. Cazacu	Fast laser imaging optical emission spectroscopy: aerosols types detection and ranging
	H.-J. Im, J.-W. Yeon, K. Song	Lab scale set-up for a behavioral study of iodine aerosols
	L. Kómar, I. Kohút, M. Bednárik, M. Kocifaj	Optical efficiency of tubular light guide under different aerosol scattering phase functions
<b>Coffee break (11:00)</b>	√	
<b>Session 4 (11:30-12:30)</b>	K. Muinonen, A. Penttilä, G. Videen	Multiple Scattering of Light by Large Complex Particles
	H. Lindqvist, T. Nousiainen, K. Muinonen	Particle-to-particle variation in scattering by mineral dust: From simplified models to realistic, inhomogeneous particles
<b>Lunch (12:30-14:00)</b>	+ some beers	
<b>Session 5 (14:00-16:00)</b>	<u>U. K. Krieger,</u>	Retrieving radial inhomogeneities

	D. M. Lienhard, S. Steimer, Y.-F. Te	in particle composition of single, levitated aerosol particles using Mie resonance spectroscopy
	B. Rosati, E. Weingartner, P. Zieger, M. Gysel, U. Baltensperger	Hygroscopicity and mixing state of aerosols in the planetary boundary layer
	C. Wang, Y. Pan	Cavity ringdown spectroscopy for characterization of single aerosol particles
	J. Markkanen, H. Lindqvist, T. Nousiainen, K. Muinonen, S. Järvenpää	Volumetric current integral equation formulation for modeling scattering by atmospheric aerosol particles
<b>Coffee break (16:00)</b>	√	
<b>Session 6 (16:30-18:00)</b>	B. Bergmans, F. Lenartz, L. Spanu, G. Gerard	The use of Optical particle counter as sizing instrument and as reference instrument for PM regulated monitoring
	H. A. S. Lamphar, F. Kundracik, M. Kocifaj	A measuring system for retrieval of urban emission function from nightsky radiance data
	Z. Ulanowski, P. H. Kaye, E. Hirst, A. Wieser, W. R. Stanley	Miniature, low-cost optical particle counters
<b>Dinner (18:30-?)</b>	-	

	7.11. Thursday	
<b>Breakfast (7:00-8:30)</b>	buffet	
<b>Session 7 (8:30-10:00)</b>	E. Zubko, Y. Shkuratov, G. Videen	Characterization of dust particles with the degree of linear polarization
	B. Redding, Y. Pan, H. Cao	Polarization resolved angular optical scattering of aerosol particles
	M. Berg	Characterization of aerosol particles with digital holography
<b>Coffee break (10:00)</b>	√	
<b>Session 8 (10:30-12:00)</b>	M. Laborde, G. Kassell, A. Kasper-Giebl, I. Meran, U. Nickus, R. Hitzenberger, A. Wonaschütz, G. Mocnik, L. Drinovec, G. Wotawa, G. Schauer	Influence of Saharan dust events on scattering phase function

	<u>O. Muñoz, F. Moreno, J. L. Ramos</u>	Characterization of mineral dust samples from measurements of scattering matrix elements at two different wavelengths in the visible
<b>Concluding Remarks</b>		
<b>Lunch (12:00-13:30)</b>		√
<b>Departure (13:30)</b>		√
<b>Arrival Bratislava (15:00)</b>		√

Talk Format: First and foremost, it is important for presenters to keep in mind that this is a workshop. We hope and anticipate that presentations will highlight what research needs to be done, rather than what has been completed. Of course, presentation of novel results also is encouraged. We expect audience participation throughout the presentations. Second, do not feel too constrained by time. Although, we have allotted 30-minute slots, we expect some presentations to be longer and others to be shorter. Presenters may consider talks of 10-15 minutes duration, with breakpoints for discussion. Back-up slides are strongly encouraged as it is difficult to anticipate where discussions may lead.
